# Research Helper

Research helper is another research manager which has is a reference management tool with various useful functionalities such as: built-in PDF reader, live markdown note and excalidraw note.

## Contribute to Research-Helper

Research Helper uses [QUASAR](#) as framework. In this project, the combination of [Languages](#) and [Tauri](#) is used.

**Install the dependencies**

Vue 3.0 100% TypeScript 4.7% CSS 1.0% SCSS 4.7% JavaScript 3.8% HTML 0.3% Rust 0.1%

**Suggest** `yarn install` // strongly recommended  
Base `// or`  
`npm install`

 **Start the electron app in development mode (hot code reloading, error reporting, etc.)** [Set up](#)

Automatically convert CLOUD files to YAML for GitHub Actions.

 `yarn tauri dev` # start tauri app in development mode  
`yarn tauri build` # build the app with debugger  
[Configure](#)

 **Acknowledgement** [Configure](#)

Build and test a Node.js project with npm.  
This project is made possible by the following open source projects.
